

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A diagnostic and prognostic method for ~~predicting the risk of a disease~~ oral diseases, comprising the steps of:

- a) providing a saliva sample from a subject;
- b) isolating a mucin in said saliva sample to produce an isolated mucin; and
- c) quantitating the content of a component associated of with said isolated mucin to ~~predict the risk of~~ diagnose a an oral disease or to predict a future development of the oral disease in said subject, wherein the oral disease is selected from a group consisting of dental caries, periodontal diseases, mucosal infections, oral and pharyngeal cancers and precancerous lesions, and a combination thereof.

2. (Withdrawn) The method of Claim 1, wherein said saliva sample is a stimulated saliva sample.

3. (Original) The method of Claim 1, wherein said saliva sample is an unstimulated saliva sample.

4. (Withdrawn) The method of Claim 1, wherein said component is total apomucin.

5. (Withdrawn) The method of Claim 1, wherein said component is total carbohydrate.

6. (Original) The method of Claim 1, wherein said component is sialic acid.

7. (Original) The method of Claim 1, wherein said mucin is MUC7 mucin.
8. (Withdrawn) The method of Claim 1, wherein said mucin is MUC5AC mucin.
9. (Withdrawn) The method of Claim 1, wherein said mucin is MUC5B mucin.
10. (Original) The method of Claim 1, further comprising the step of reporting the content of said component in said isolated mucin as units per milliliter of said saliva sample.
11. (Currently amended) The method of Claim 1, wherein the oral disease is dental caries and the method further comprising comprises the step steps of:
 - (i) correlating the determined quantity of the component of the isolated mucin to a concentration of the isolated mucin and
 - (ii) assessesing determining the a risk of said disease as high, medium or low future development of caries by comparing the concentration of the isolated mucin with predetermined values.
12. (Canceled)
13. (Currently amended) The method of Claim ~~12~~ 1, ~~further comprising the step of assessing wherein~~ the risk of future development of said disease in said subject is determined at subsequent ages.
14. (Original) The method of Claim 1, wherein said isolating step comprises isolating said mucin using SDS-PAGE.

15. (Original) The method of Claim 1, wherein said quantitating step comprises specifically binding said component in said isolated mucin.

16. (Original) The method of Claim 15, wherein said binding comprises direct binding or facilitated binding.

17. (Original) The method of Claim 16, wherein said direct binding comprises dye-binding.

18. (Original) The method of Claim 16, wherein said facilitated binding comprises linking a specifically binding member pair to a surface that specifically binds to said component of said isolated mucin.

19. (Original) The method of Claim 18, wherein said specifically binding member pair is selected from the group consisting of antibodies and lectins.

20. (Original) The method of Claim 1, wherein said subject is a human.

21. (Original) The method of Claim 20, wherein said human is selected from the group consisting of males and females.

22. (Original) The method of Claim 20, wherein said subject is aged between 18 and 35 years old.

23. (Currently amended) The method of Claim 1 ~~and~~ 75, wherein said disease is selected from the group consisting of dental caries, periodontal diseases, pulmonary diseases, respiratory diseases, cardiovascular diseases, diabetes, perinatal disorders, mucosal infections, oral cancers, pharyngeal cancers, precancerous

lesions, associated autoimmune disorders, HIV, osteoporosis, and a combination thereof.

24. (Withdrawn) The method of Claim 23, wherein said periodontal diseases are selected from the group consisting of gingivitis, adult periodontitis, early-onset periodontitis, and a combination thereof.

25. (Withdrawn) The method of Claim 23, wherein said cardiovascular diseases are selected from the group consisting of heart attack, stroke and atherosclerosis.

26. (Withdrawn) The method of Claim 23, wherein said perinatal disorders are selected from the group consisting of low birth weight and preterm births.

27. (Withdrawn) The method of Claim 23, wherein said diabetes is Type 1 diabetes or Type 2 diabetes.

28. (Withdrawn) The method of Claim 23, wherein said mucosal infections are selected from the group consisting of oral candidiasis, herpes simplex virus infections, herpes zoster virus infections, varicella zoster virus infections, human papillomavirus infections, oral human papillomavirus infections, recurrent aphthous ulcers, and combinations thereof.

29. (Withdrawn) The method of Claim 28, wherein said herpes simplex virus is Type 1 or Type 2.

30. (Original) The method of Claim 23, wherein said disease is dental caries.

31. (Currently amended) The method of Claim 30, wherein said dental caries is selected from the group consisting of early-onset dental caries, adult dental caries, and root caries, ~~DFT, DMF, and DMFS~~.

32. (Withdrawn) A method for reducing the risk of a disease, comprising the steps of:

- a) providing a saliva sample from a subject;
- b) isolating a mucin in said saliva sample to produce an isolated mucin;
- c) quantitating the content of a component in said isolated mucin; and
- d) administering a therapeutic reagent to said subject when the content of said component in said isolated mucin significantly falls below the level expressed in an oral fluid standard.

33. (Withdrawn) The method of Claim 32, wherein said saliva sample is a stimulated saliva sample.

34. (Withdrawn) The method of Claim 32, wherein said saliva sample is an unstimulated saliva sample.

35. (Withdrawn) The method of Claim 32, wherein said component is total apomucin.

36. (Withdrawn) The method of Claim 32, wherein said component is total carbohydrate.

37. (Withdrawn) The method of Claim 32, wherein said component is sialic acid.

38. (Withdrawn) The method of Claim 32, wherein said mucin is MUC7 mucin.

39. (Withdrawn) The method of Claim 32, wherein said mucin is MUC5AC mucin.

40. (Withdrawn) The method of Claim 32, wherein said mucin is MUC5B mucin.

41. (Withdrawn) The method of Claim 32, wherein said isolating step comprises isolating said mucin using SDS-PAGE.

42. (Withdrawn) The method of Claim 32, wherein said quantitating step comprises specifically binding said component of said isolated mucin.

43. (Withdrawn) The method of Claim 42, wherein said binding comprises direct binding or facilitated binding.

44. (Withdrawn) The method of Claim 43, wherein said direct binding comprises dye-binding.

45. (Withdrawn) The method of Claim 43, wherein said facilitated binding comprises linking a specifically binding member pair to a surface that specifically binds to said component of said isolated mucin.

46. (Withdrawn) The method of Claim 45, wherein said specifically binding member pair is selected from the group consisting of antibodies and lectins.

47. (Withdrawn) The method of Claim 32, wherein said subject is a human.

48. (Withdrawn) The method of Claim 47, wherein said human is selected from the group consisting of males and females.

49. (Withdrawn) The method of Claim 32, wherein said subject is aged from between 18 to 35 years of age.

50. (Withdrawn) The method of Claim 32, wherein said disease is selected from the group consisting of periodontal diseases, pulmonary diseases, respiratory diseases, cardiovascular diseases, diabetes, perinatal disorders, mucosal infections, oral cancers, pharyngeal cancers, precancerous lesions, associated autoimmune disorders, HIV, osteoporosis, and a combination thereof.

51. (Withdrawn) The method of Claim 50, wherein said periodontal diseases are selected from the group consisting of gingivitis, adult periodontitis, early-onset periodontitis, and a combination thereof.

52. (Withdrawn) The method of Claim 50, wherein said cardiovascular diseases are selected from the group consisting of heart attack, stroke and atherosclerosis.

53. (Withdrawn) The method of Claim 50, wherein said perinatal disorders are selected from the group consisting of low birth weight and preterm births.

54. (Withdrawn) The method of Claim 50, wherein said diabetes is Type 1 diabetes or Type 2 diabetes.

55. (Withdrawn) The method of Claim 50, wherein said mucosal infections are selected from the group consisting of oral candidiasis, herpes simplex virus infections, herpes zoster virus infections, varicella zoster virus infections, human

papillomavirus infections, oral human papillomavirus infections, recurrent aphtous ulcers, and combinations thereof.

56. (Withdrawn) The method of Claim 55, wherein said herpes simplex virus is Type 1 or Type 2.

57. (Withdrawn) The method of Claim 32, wherein said disease is dental caries.

58. (Withdrawn) The method of Claim 57, wherein said dental caries is selected from the group consisting of early-onset dental caries, adult dental caries, root caries, DFT, DMF, and DMFS.

59. (Withdrawn) The method of Claim 57, wherein said therapeutic reagent is an anti-caries reagent.

60. (Withdrawn) The method of Claim 32, wherein said oral fluid standard comprises a sample from a normal control.

61. (Withdrawn) A diagnostic kit for detecting a disease comprising:

- a) a means for collecting a saliva sample;
- b) a means for isolating a mucin in said saliva sample, to produce an isolated mucin;
- c) a means for measuring the amount of a component in said isolated mucin; and
- d) an oral fluid standard for comparing the amount of said component in said isolated mucin.

62. (Withdrawn) The method of Claim 61, wherein said oral fluid standard comprises the content of said component in said mucin of a normal subject.

63. (Withdrawn) The diagnostic kit of Claim 61, wherein said disease is selected from the group consisting of dental caries, periodontal diseases, pulmonary diseases, respiratory diseases, cardiovascular diseases, diabetes, perinatal disorders, mucosal infections, oral cancers, pharyngeal cancers, precancerous lesions, associated autoimmune disorders, HIV, osteoporosis, and a combination thereof.

64. (Withdrawn) The diagnostic kit of Claim 63, wherein said periodontal diseases are selected from the group consisting of gingivitis, adult periodontitis, early-onset periodontitis, and a combination thereof.

65. (Withdrawn) The diagnostic kit of Claim 63, wherein said cardiovascular diseases are selected from the group consisting of heart attack, stroke and atherosclerosis.

66. (Withdrawn) The diagnostic kit of Claim 63, wherein said perinatal disorders are selected from the group consisting of low birth weight and preterm births.

67. (Withdrawn) The diagnostic kit of Claim 63, wherein said diabetes is Type 1 diabetes or Type 2 diabetes.

68. (Withdrawn) The diagnostic kit of Claim 63, wherein said mucosal infections are selected from the group consisting of oral candidiasis, herpes simplex virus infections, herpes zoster virus infections, varicella zoster virus infections, human papillomavirus infections, oral human papillomavirus infections, recurrent aphthous ulcers, and combinations thereof.

69. (Withdrawn) The diagnostic kit of Claim 68, wherein said herpes simplex virus is Type 1 or Type 2.

70. (Withdrawn) The diagnostic kit of Claim 63, wherein said disease is dental caries.

71. (Withdrawn) The diagnostic kit of Claim 69, wherein said dental caries is selected from the group consisting of early-onset dental caries, adult dental caries, root caries, DFT, DMF, and DMFS.

72. (New) The method of Claim 11, wherein the risk of future development of caries is designated as high if the concentration of the isolated mucin is lower than 450 units per ml, the risk of developing caries is designated as medium if the concentration of the isolated mucin is higher than 450 units per ml and lower than 1150 units per ml, and the risk of developing caries is designated as low if the concentration of the isolated mucin is higher than 1150 units per ml.

73. (New) The method of Claim 30 further comprising predicting future development of decayed and filled teeth (DFT); decayed, missing and filled teeth (DMFT), or decayed, missing, and filled surfaces (DMFS) based on the measured amount of sialic acid.

74. (New) The method of claim 1 wherein the periodontal diseases is selected from a group consisting of gingivitis, adult periodontitis, and early onset periodontitis.

75. (New) A diagnostic and prognostic method comprising the steps of:

- a) providing a saliva sample from a subject;
- b) isolating a mucin from all other sialic acid-containing molecules in said saliva sample to produce an isolated mucin; and

c) measuring an amount of sialic acid associated with the isolated mucin to diagnose or to predict a future development of a disease in said subject.

76. (New) The method of Claim 75, wherein said saliva sample is an unstimulated saliva sample.

77. (New) A diagnostic and prognostic method comprising the steps of:

- a) providing an unstimulated saliva sample from a subject;
- b) isolating a mucin to produce an isolated mucin; and
- c) quantitating the content of a component of said isolated mucin to diagnose or to predict a future development of a disease in said subject.

78. (New) The method of Claim 77, wherein said component is sialic acid.

79. (New) The method of Claim 77, wherein said disease is selected from the group consisting of dental caries, periodontal diseases, pulmonary diseases, respiratory diseases, cardiovascular diseases, diabetes, perinatal disorders, mucosal infections, oral cancers, pharyngeal cancers, precancerous lesions, associated autoimmune disorders, HIV, osteoporosis, and a combination thereof.
